Gold – The Money of Last Resort

Seeing Beyond Economic Confusion from the Vantage Point of Gold

Gold has outperformed every other asset class over the past decade and finally financial and mainstream media are starting to take notice. Nick Barisheff, President and CEO of Bullion Management Group Inc., will offer insights that will help investors understand the different methods of buying gold and will give his views of why buying physical bullion is the safest strategy.

The presentation will include:

- Why hold gold? How gold is different from other investment classes.
- The current gold trends. Plus three irreversible trends: why aging populations, the rise of outsourcing, and peak oil production all point to higher gold prices.
- Not all gold investments are equal – understanding the different gold investment vehicles.
- Why physical bullion products offer real wealth protection and true portfolio diversification for the coming decade.
- Answers to questions you may have during the 20 minutes Q&A

Nick Barisheff is president and CEO of Bullion Management Group Inc. (BMG), a precious metals bullion investment company which provides investors with a cost-effective, convenient way to purchase and store physical gold, silver and platinum bullion. Widely recognized as a North American bullion expert, Mr. Barisheff is an author, speaker and financial commentator who is a regular contributor to several investment newsletters and magazines and regularly appears in the media to provide his view on precious metals, economics, and the markets. Mr. Barisheff's view on the precious metals sector is that it holds the best long-term promise for investors.

BMG is a precious metals bullion investment company. BMG offers a cost-effective and convenient way to hold physical bars of gold, silver, and platinum that does not compromise the attributes of bullion: absolute liquidity, no counterparty risk, and independent of management skills. BMG BullionFund and BMG Gold BullionFund are open-ended mutual fund trusts holding physical bullion. BMG BullionBars enable investors to purchase gold, silver and platinum bullion and store the bars on an allocated and insured basis. For more information please visit: www.bmgbullion.com
